Notes

0.1 11/10/2021 - 11/15-2021

- Subjects 1-16 ran from 11/10/2021 - 11/15/2021
 - button box labeled A was on left generating key 1
 - button box labeled B was on right generating key 2
- By convention, we will always have left button box generate key 1 and right button box generate key 2. This is what the PsychoPy experiment expects.
- We will try and switch physical button boxes every 16 subjects to randomize any possible effects of physical differences.

0.2 11/16/2021

- Switch button boxes physical location and key press on 11/16/2021 in preparation for subjects 16-32
 - button box labeled A now on right generating key 2
 - button box labeled B now on left generating key 1

0.3 11/22/2021

- Switch button boxes again as we have now completed subjects 16-32 in preparation for subject 33
 - button box labeled A now back to left generating key 1 111, confirming, left is always key 1
 - button box labeled B now back to right generating key 2 222 confirming, right is always key 2

0.4 12/01/2021

- Completed subject 48 today, switching button boxes

- button box labeled A now on right generating key 2 22222, confirming right is always key 2
- button box labeled B now on left generating key 1 11111, confirming left is always key 1

Observations

- Original subject 0007 on 11/11/2021 became ill and/or experienced difficulties during experiment. Experiment was stopped and data was archived as BAD_0007. We will use BAD_XXXX to archive any incomplete or stopped experiments in the data repository for now.
